

Case Study

CJ Occupational Therapy

Safe patient handling
receives a Thumbs Up from
CJ Occupational Therapy

When CJ Occupational Therapy required a reliable and discreet ceiling hoist system they approached Reval Continuing Care for an integrated solution.

Jackie Waller owner of CJ Occupational Therapy and qualified Occupational Therapist says “We deal with patients who require adaptations and specialist equipment in their own homes. The requirement for effective and comfortable lifting equipment is essential, but equally so how it looks.

“You cannot under estimate how complicated it can be to specify a hoist system that allows for exceptional freedom of movement. Chris Prescott of Reval is absolutely worth his weight in gold when it comes to specifying ceiling hoists for smooth integration into just about any setting, domestic or otherwise. You know your in safe hands with Reval.”

Chris Precott, Northern Area Sales Manager, Reval says: “Adapting a room or a home, or specifying effective safe and stable hoist and rail systems into a new build environment is an incredibly complicated task.

Assessment of patient functional skills, requirements and needs are priority, but likewise so is understanding how the technology will work within an existing building or new build.

We have extensive project management experience in specifying the right solution for moving and lifting needs and are really happy to be helping CJ Occupational Therapy find real workable and effective solutions for their clients.”

Proud to be an authorised Guldmann installer embracing the company ethos of “Time to Care” Gulmann hoists and tracking systems are the perfect addition to Reval’s hi-quality assisted bathing solutions and products maximum mobility, safety, and dignity exceeding the needs of the care sector.
