

Guldmann™

Slings and lifting accessories

Slings and lifting accessories

Slings and other lifting accessories are a key part of the extensive range of Guldmann equipment for lifting, moving, positioning, training, and mobilising people.

Specially designed slings make it easy, practical and quick for the carer to support the user while being lifted and moved from one point to another, as well as ensuring that the carer can undertake such operations with a minimum of effort and strain.

All Guldmann slings are designed for comfort, dignity and ease of use with both mobile and ceiling hoist systems, and are ideal for moving people to and from beds and wheelchairs, as well as in sitting and lying positions, as required.

Special Guldmann sling designs are available for lifting and moving users with:

- different abilities to participate actively
- different degrees of body control and muscular strength
- different degrees of mobility
- single and double amputations
- special needs

and for both adults and children of many different sizes and weights.

They can also be used as integral parts of training and activity programmes for users. All Guldmann slings are available in a reusable (washable) version and/or in a disposable version to help ensure the best possible hygiene.

Accessories

In addition to slings, Guldmann provides a wide range of specially designed lifting accessories for helping both the user and carer ensure greater mobility with less effort. And they allow the carer to provide the best possible assistance, while working in ergonomically correct positions.

Normal washing at the indicated temperature

Do not use bleaching agent

Tumble-drying at low temperature

Do not iron

The coloured loops ensure symmetry in the lift and at the same time ease the communication in connection with the lift

ABC Slings

- ① **Coloured loops**
The coloured loops ensure symmetry in the lift
- ② **Material**
Dirt repellent polyester characterized by its strength and elasticity
- ③ **Auxiliary straps**
It is possible to use auxiliary straps

- ④ **Padding on legs**
All slings with divided leg supports have inset foam pads on legs. Easier to put on – smoother on skin
- ⑤ **Centre of sling marking**
- ⑥ **Information-label**
Indicates all that the carer needs to know

- ⑦ **Label with size indication**
Makes it easy and simple to find the correct size of sling
- ⑧ **Padding in back section**
For added comfort on models with small back surface
- ⑨ **Positioning pocket**
All Basic slings are provided with a pocket to ease correct positioning of sling

Fit
Improved fit and more sizes to choose from for added comfort and safety

Strength
Max. capacity increased to 255/500 kg

Washing
Easy handling, the sling can be washed at 80°C and tumble-dried at max. 50°C

ABC Slings – Active

1 Active Trainer

Function

Provides support around the chest and shoulder areas. Detachable leg straps give support around the hip area and prevent the user from sliding out of the sling.

Suitable for

- persons with reduced body balance, but must be able to bear weight on their legs
- walking training • supported standing and upright postures • early mobilization.

..... 2830xx

2 Active Micro

Function

Supports the upper part of the body (from the pelvis to under the shoulders) around the chest and upper thigh. The chest straps tighten around the chest.

Suitable for

- lifting persons with head control, but with a reduced muscular strength of upper part of the body and above hip joint and thighbone
- for some persons with extension spasms
- in situations where the sling should be put on and taken off easily • lifting to and from a seated position • situations where a large opening at the bottom is required, such as access for toileting and hygiene.

..... 2840xx

3 Active Micro Plus

Function

Supports the upper part of the body (from the pelvis to under the shoulder) around the chest and upper thigh. Support belt can be adjusted.

Suitable for

- lifting persons with head control, but with a reduced muscular strength of upper part of the body and above hip joint and thighbone
- in situations where the sling should be put on and taken off easily • lifting to and from a seated position • situations where a large opening at the bottom is required, such as access for toileting and hygiene.

..... 2815xx

ABC Slings – Basic

4

5

6

4

Basic Basic

Function

Supports the whole body excluding the head.

Suitable for

- lifting persons with head control and with or without body control
- lifting to and from a seated or half-seated position (bed and wheelchair etc.)
- lifting and transfers from all patient furniture surfaces.

..... 270xxx

5

Basic Low

Function

Supports the body up to shoulder height.

Suitable for

- lifting persons with head and body control
- lifting to and from a seated position, (chair and bed etc.)
- lifting and transfers from all patient furniture surfaces.

..... 271xxx

6

Basic High

Function

Supports the whole body including the head.

Suitable for

- lifting persons with little control over their head and body
- lifting to and from a lying position (bed and floor etc.)
- lifting to and from a seated position
- lifting and transfers from all patient furniture surfaces and the floor.

..... 272xxx

ABC Slings – Basic

7
Basic Shell

Function
Supports the whole body and the head, but allows the arms to be outside the sling.

Suitable for
• lifting persons with little control over their head and body • lifting to and from a lying position (bed and floor etc.) • lifting to and from a seated position – letting the sling stay in the wheelchair.
..... 2750xx

8
Basic Hammock

Function
Supports the whole body apart from the head. If head support is required, the head support can be used in conjunction with the sling. Adds extra support around the hip and thigh area. Can be used as divided legs or as a cross over position, this also provides good support for the amputee (amputee users **must** be assessed for this sling).

Suitable for
• lifting persons with little control over their body • lifting to and from a lying position (bed and floor etc.) • lifting to and from a seated position • persons who need added support around the hip and thighs.
..... 2740xx

ABC Slings – Custom

9

10

11

9

Sit-On

Function

Supports the thighbone and back. The user sits on the sling.

Suitable for

Persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the person while lying, but is used when lifting to and from a seated position in bed or wheelchair.

..... 2950xx

10

Sit-On High

Function

Supports the thighbone, back and head. The user sits on the sling.

Suitable for

Persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the person while lying, and is used when lifting to and from a lying position.

..... 2960xx

11

Custom Amputee

Function

Supports the whole body up to shoulder height and the pelvis region.

Suitable for

- lifting both single and double (above knee joint) amputees
- lifting double and high amputees
- lifting from a lying position. Head support should be used to support head.

..... 2900xx

ABC Slings – Custom

12

13

12

Sit-On Comfort

Function

Supports the thighbone and back. The user sits on the sling. The design of the sling prevents the thighbone from an invert rotation when hoisting. Added comfort due to the Spacer material.

Suitable for

Persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the person while lying, but is used when lifting to and from a seated position in bed or wheelchair.

..... 2930xx

13

Sit-On Comfort High

Function

Supports the thighbone, back and head. The adjustable head support can be folded down when user is left in sitting position on the sling. The design of the sling prevents the thighbone from an invert rotation when hoisting. Added comfort due to the Spacer material.

Suitable for

Persons who remain on the sling for long periods due to high weight or customized wheelchair.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the person while lying, and is used when lifting to and from a lying position.

..... 2940xx

ABC Slings – Kids

14

15

16

14

Basic Basic – Kids

Function

Supports the whole body excluding the head. The inside belt offers an extra support of the body.

Suitable for

- lifting kids with head control and with or without body control
- lifting to and from a seated or half-seated position (bed and wheelchair etc.).

..... 270xxx

15

Basic High – Kids

Function

Supports the whole body including the head. The inside belt offers an extra support of the body.

Suitable for

- lifting kids with little control over their head and body
- lifting to and from a lying position (bed, changing bench and floor etc.)
- lifting to and from a seated position.

..... 272xxx

16

Active Vest – Kids

Function

Supports the body and pelvis. The width can be adjusted.

Suitable for

- kids with reduced body balance
- walking training
- supports standing and upright postures
- playing.

..... 2831xx

ABC Slings – Kids

17
Sit-On Comfort – Kids

Function

Supports the thighbone and back. The user sits on the sling. The design of the sling prevents the thighbone from an invert rotation when hoisting. Added comfort due to the Spacer material.

Suitable for

Kids who remain on the sling for long periods due to customized wheelchair, or need hoisting regularly.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the child while lying, but is used when lifting to and from a seated position in bed or wheelchair

..... 2930xx

18
Sit-On Comfort High – Kids

Function

Supports the thighbone, back and head. The adjustable head support can be folded down when user is left in sitting position on the sling. The design of the sling prevents the thighbone from an invert rotation when hoisting. Added comfort due to the Spacer material.

Suitable for

Kids who remain on the sling for long periods due to high weight or customized wheelchair.

Other features

- helps reduce the risk of sliding out of wheelchair
- material prevents heat generation between body and sling
- sling is fitted on the child while lying, and is used when lifting to and from a lying position.
